

Account Management

- Outline the list of departments you will need within your proposed environment.

- Start your virtualization software.

- Sign into the Windows server machine as Administrator.

- Open file explorer and navigate to the C: drive.

- Once in the C: drive click the plus button in the top left.

- Create a new folder.

- Name the folder “shares”.

- Verify you have made a folder named “shares” under the C: drive.

- Click the windows button.

- Search for command prompt.

- Make sure command prompt is signed into administrator.

- Navigate back from Users to the C: drive.

- Navigate from the C: drive into “shares”.

- Make directories for each of the departments you planned out.

- Use the md command to create a new folder.

- Open up Active Directory Users and Computers (ADUC).

- Navigate to as.bank.

- Right click in the right pane and under new select organizational unit.

- It will ask you to name the OU, make sure the box is selected.

- Name this one management.

- Continue making organizational units for all departments.

- Select the accounting organizational unit with right click.

- Select new object – group and name the group “accounting”.

- Now see that under the organizational unit “accounting” there is a user group of the same name.

- Repeat these steps with management.

- Now see that management also has a user group by the same name under its organizational unit.

- Create an hr organizational unit.

- Right click in the right pane and under new select organizational unit.

- Create a sales organizational unit in the same process.

- Under sales create a user group of the same name as the organizational unit.

- Repeat the process for the rest of the 10 departments.

- Close out of ADUC and open file explorer.

- Right click on the accounting folder.

- Click Advanced Sharing.

- Select Share the folder.

- Add Everyone to Share Permissions with full control.

-
- The screenshot shows the Microsoft Excel interface. The 'Formulas' tab is active on the ribbon. The worksheet contains a list of names in column A, starting with 'Aaron Condit' in cell A2. The first five names are highlighted in green: Aaron Condit, Aaron Kirkland, Aaron Skaggs, Ronald Powell, and Algeil Alden. The status bar at the bottom indicates 'Formulas' and '100%' zoom.

-
- The screenshot shows the Microsoft Excel interface. The ribbon at the top includes tabs for Home, Insert, Draw, Page Layout, Formulas, Data, Review, View, and Automate. The 'Data' tab is active, showing options like 'Queries & Connections', 'Data Types', 'Sort & Filter', 'Filter', 'Advanced', 'Text to Columns', 'Data Tools', and 'Forecast'. The 'Formulas' tab is also visible, showing 'Get & Transform Data', 'From Text/CSV', 'Recent Sources', 'Refresh All', 'Existing Connections', 'Connections', and 'Outline'. The main worksheet area displays a list of names in column A, starting with 'Aaron Condit' and ending with 'Robert Palmer'. The status bar at the bottom shows '177-122-85-Name' and 'Count: 200%'. The system tray at the bottom right shows the date and time as '1/14/24 1:14 PM'.

- Paste them into column B and Delimit the data.

- Separate the first, middle, and last names.

- Continue to format the data.

- The screenshot shows an Excel spreadsheet with a PivotTable. The PivotTable is titled 'PivotTable1' and is located in the range \$A\$1:\$Z\$100. The PivotTable is structured with 'Last Name' in the columns and 'First Name' in the rows. The data is sorted by last name, showing groups for A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, and Z. The status bar at the bottom indicates '117,420-85 Names'.

- Copy the data in A1.

- Paste the data down the entire column to the bottom of the data set.

- Between the columns B and D add ,ou=accounting,dc=as

- Then add ,dc=bank after that.

- Continue to edit the cell.

- Add an close quotation to the end of the string.

- The screenshot shows a Microsoft Excel spreadsheet with a list of names in column A. A dropdown menu is open for cell B1, showing a list of names starting with 'A'. The names in the dropdown menu are: Alice, Amelia, Charles, Edward, Emily, James, Maria, Martha, Mary, Sarah, William, Lucinda, Paul, Thomas, Nancy, Mary Frances, George, James, Margaret, Mary Ann, Richard, Sarah, and William. The list is filtered to show names starting with 'A'.

- The screenshot shows a Windows 7 desktop with a blue background. In the foreground, a File Explorer window is open, displaying the 'shares' folder. The left sidebar shows the 'This PC' view with 'Network' selected. The main pane lists files and folders, including 'accounting', 'handoffs', 'management', and 'security'. A 'Security' dialog box is open over the 'security' folder, showing the 'Permissions for security' tab. The 'Permissions for security' list shows 'Full control' and 'Change permissions' permissions for the 'security' folder. The 'Permissions for security' list is empty, and the 'Permissions for security' list is empty.

- Boot up the workstation.

- Sign in as one of the users you added.

- It will prompt you to change the password.

- Change the password to Redvine1 to easily remember.

- Wait for the desktop to load.

- Check if you have permissions in the folder of the department that the user belongs too. See that I can create a text file under the executives folder as an executive user.

- Sign out.

- Back on the server open CMD and see the following data.

- Open ADUC. And select all users under accounting.

- Under profile select profile path and type the share path to each folder.

- Select all users under bankofficers and right click.

- Under properties do the same using the path \\asS1%\%username%

- Go to commercial.

- Select all users and right click, under properties do the same using the path \\asS1\%username%

- Do the same for consumer.

- Do the same for executives.

- Continue doing the same for each department.

- Continue doing the same for each department.
