

Backup and Restore

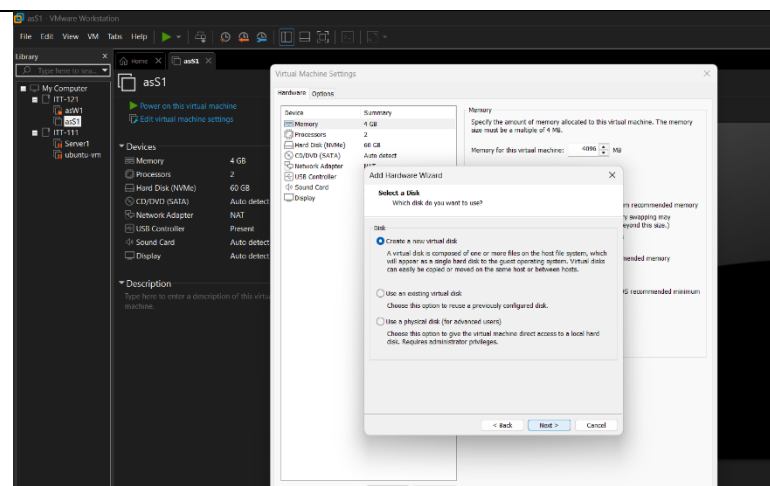

- Open Virtual Machine Settings for the Server VM and add a Hard Disk.

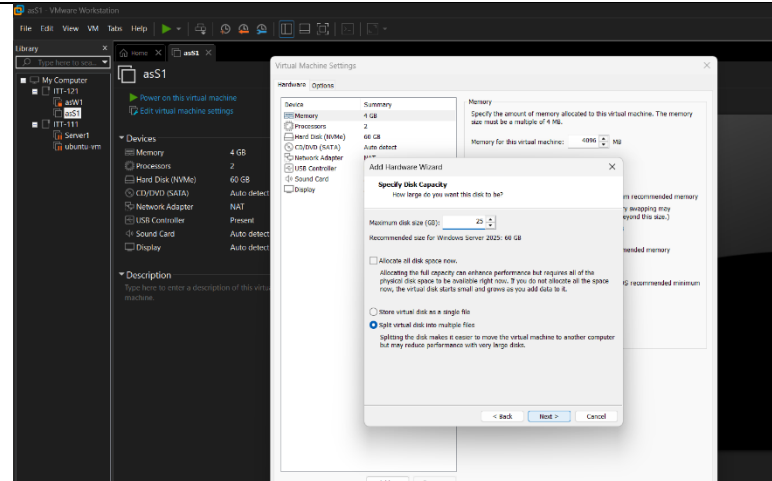

- Select "NVMe" as the virtual disk type and click Next.

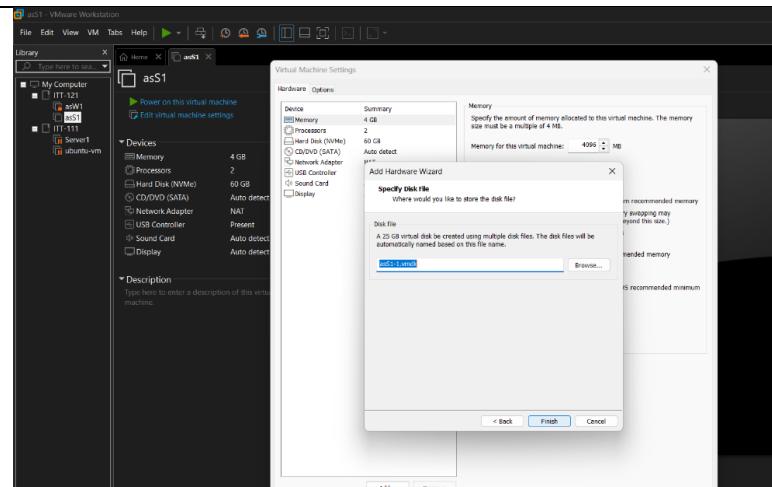

- Choose "Create a new virtual disk" and click Next.

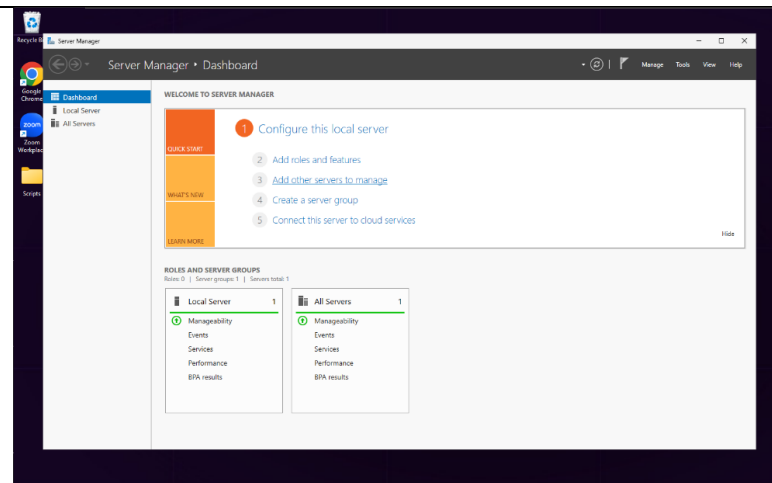

- Set the disk capacity to 25GB.

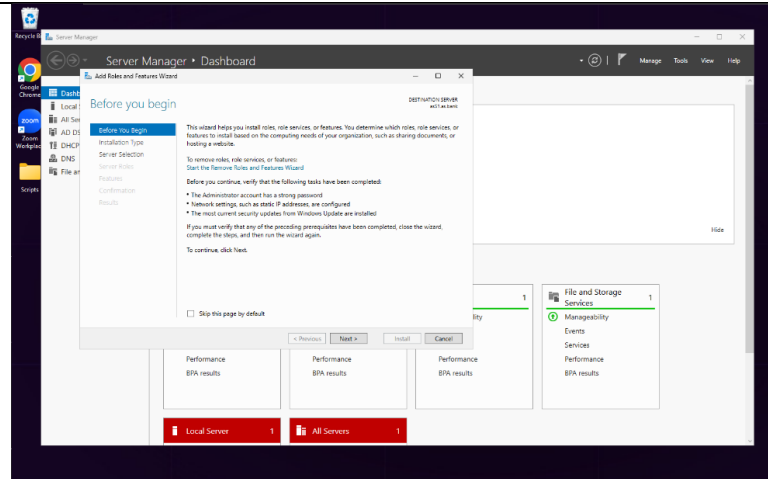

- Then specify the disk file location and click Finish.

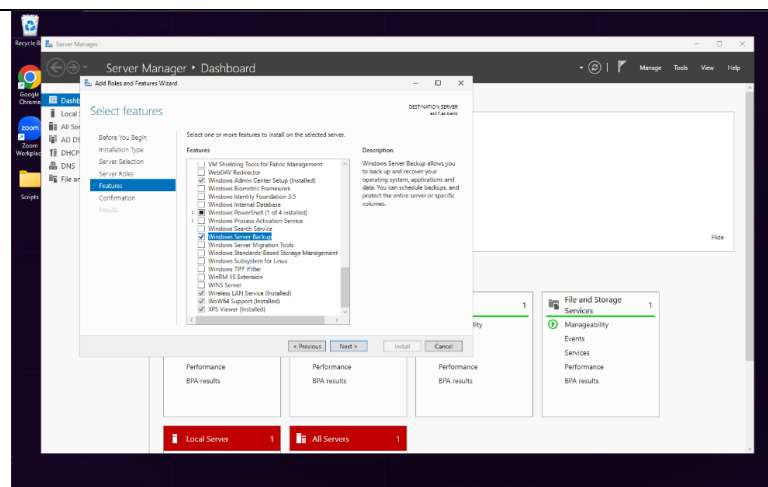

- Start the server virtual machine.

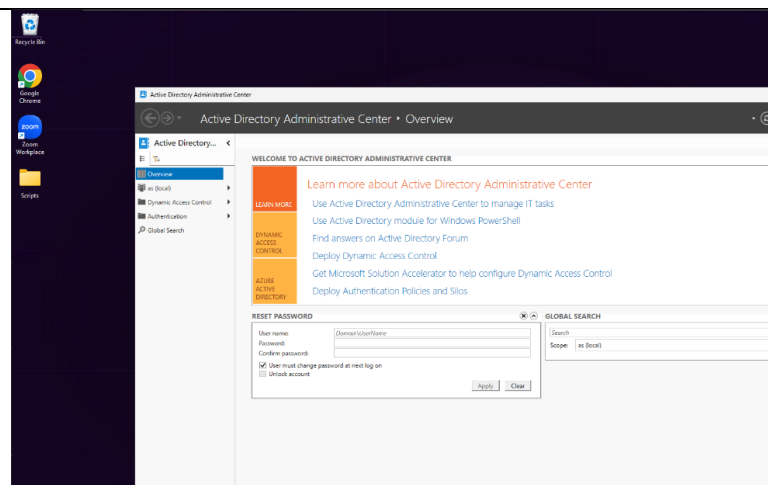

- Select Add roles and features.

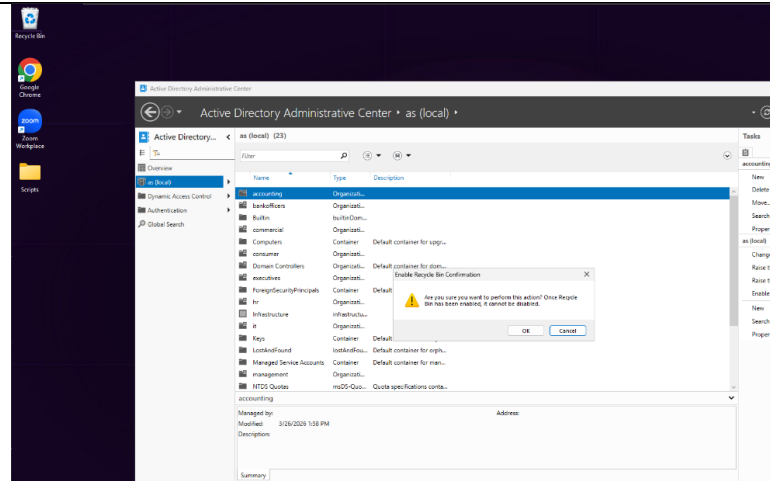

- ☐ In the Select Features screen, expand "Windows Server Backup" and check it, then click Next.

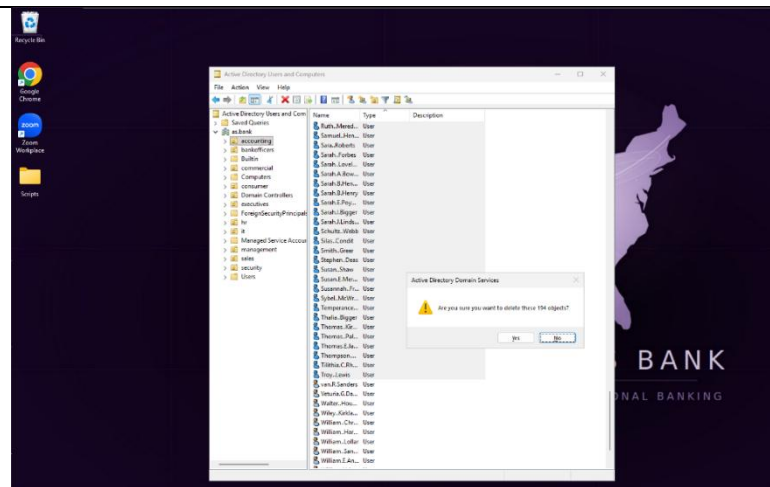

- Open Active Directory Administrative Center from Server Manager.

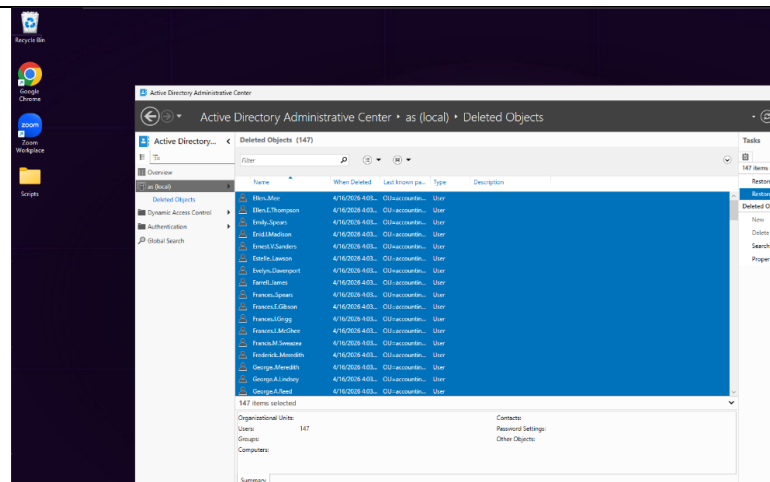

- Enable the Recycle Bin.

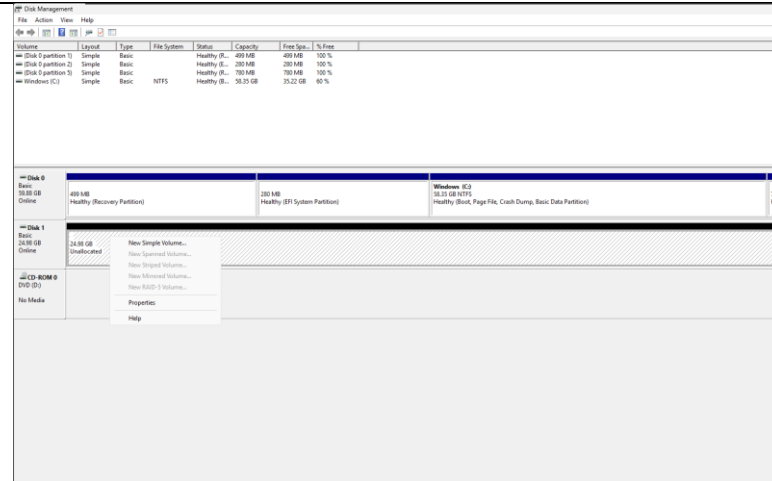

- Open Active Directory Users and Computers delete any number of users from accounting and confirm the warning prompt to proceed.

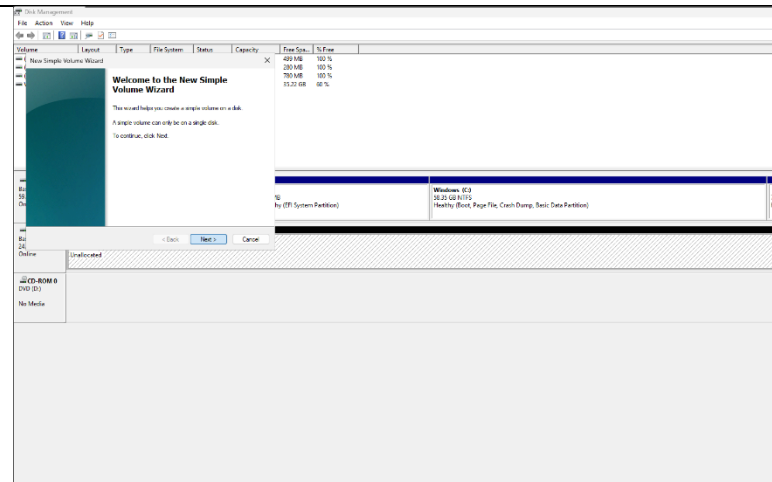

- In Active Directory Users and Computers, select users and then select Restore to recover the users.

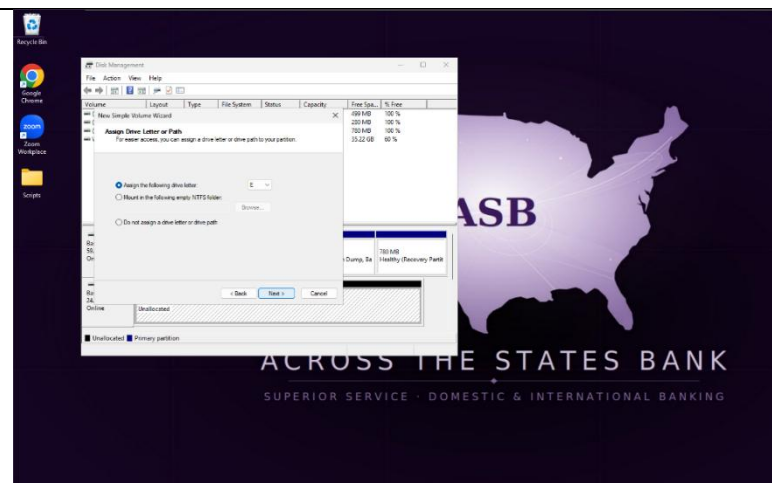

- Open Disk Management from the Server Manager Tools menu. In Disk Management, right-click the new unallocated disk.

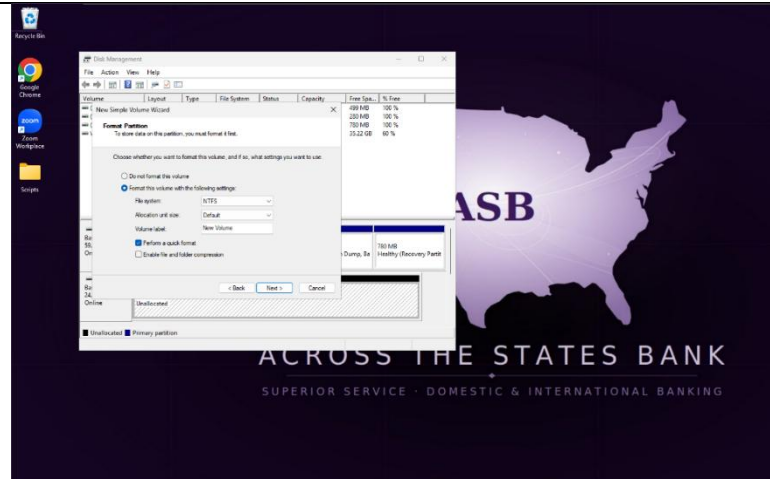

- Launch the New Simple Volume Wizard.

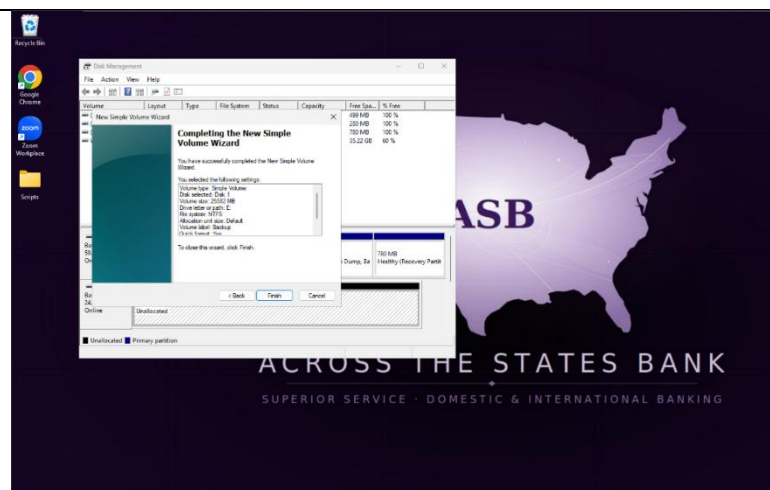

- In the New Simple Volume Wizard, assign a drive letter to the new volume.

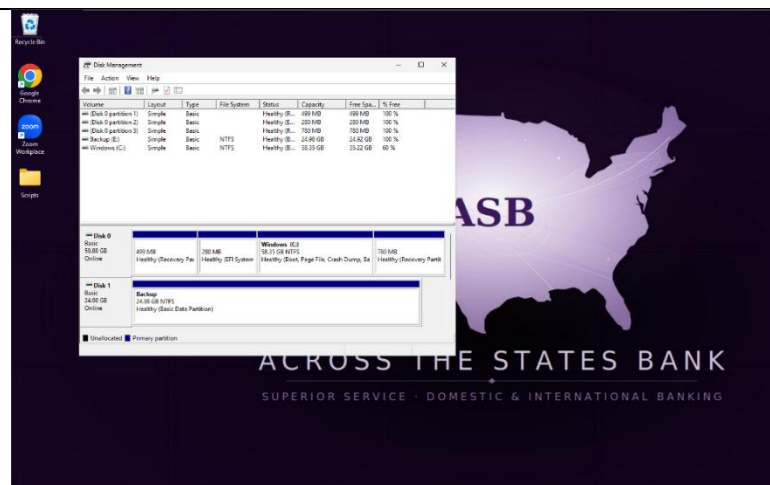

- Complete the New Simple Volume Wizard..

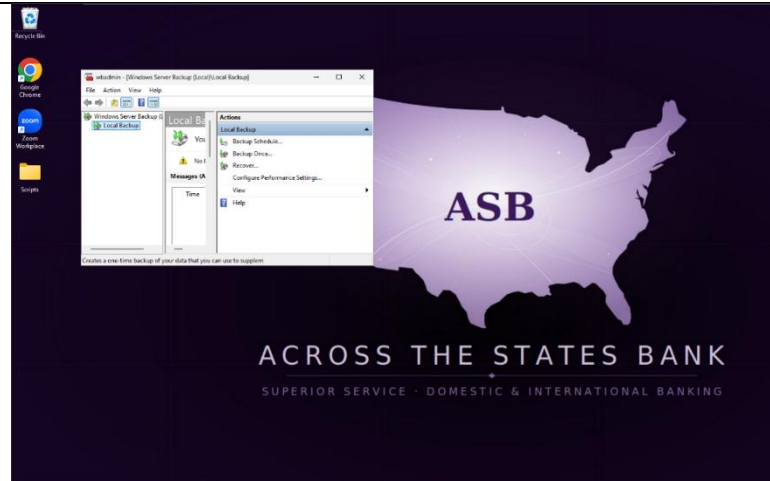

- Complete the New Simple Volume Wizard.

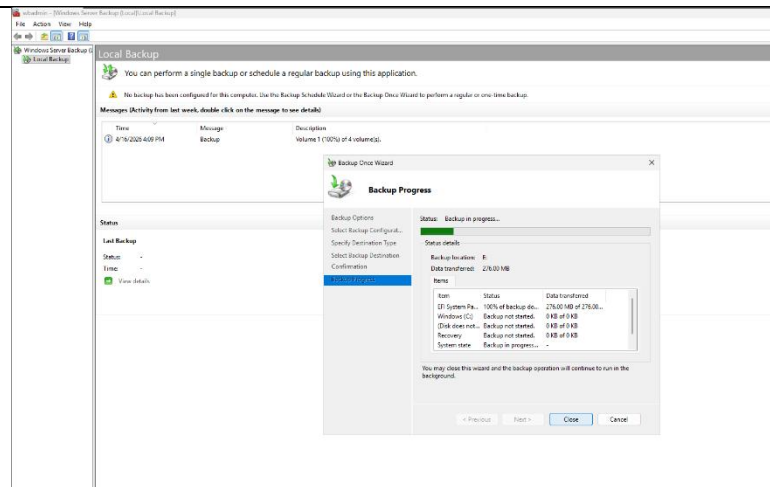

- Complete the New Simple Volume Wizard and verify the new volume appears in Disk Management.

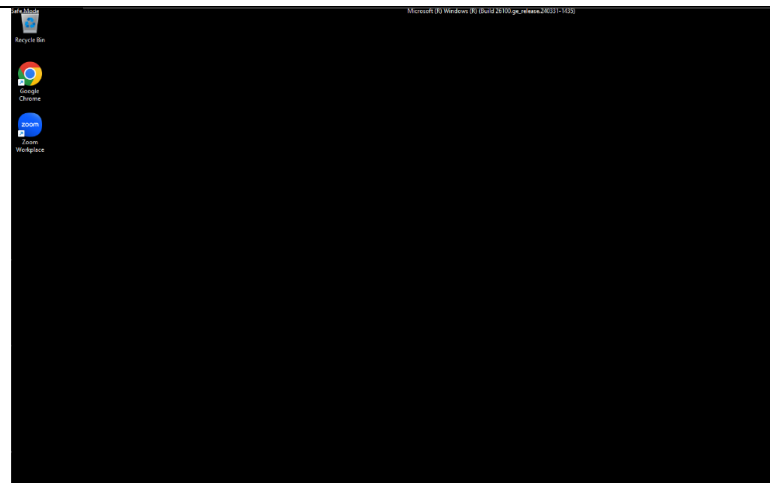

- In Windows Server Backup, click "Backup Once" to open the Backup Once Wizard and begin the backup process.

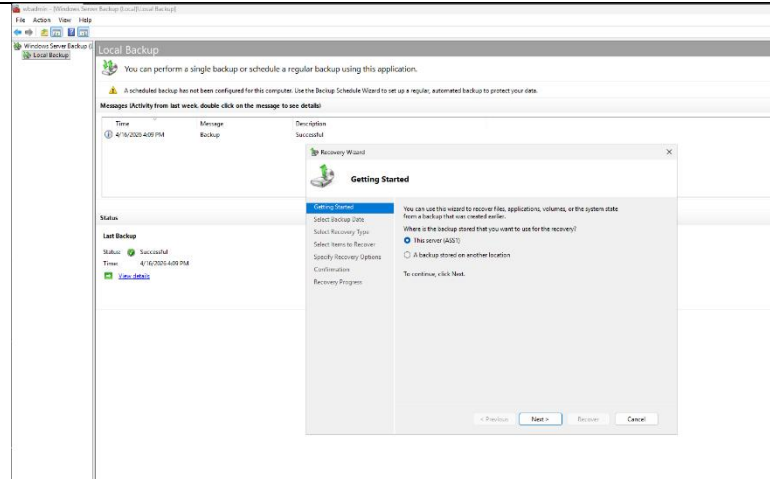

- Wait for the backup to complete. Verify the successful backup status shown in the Last Backup panel.

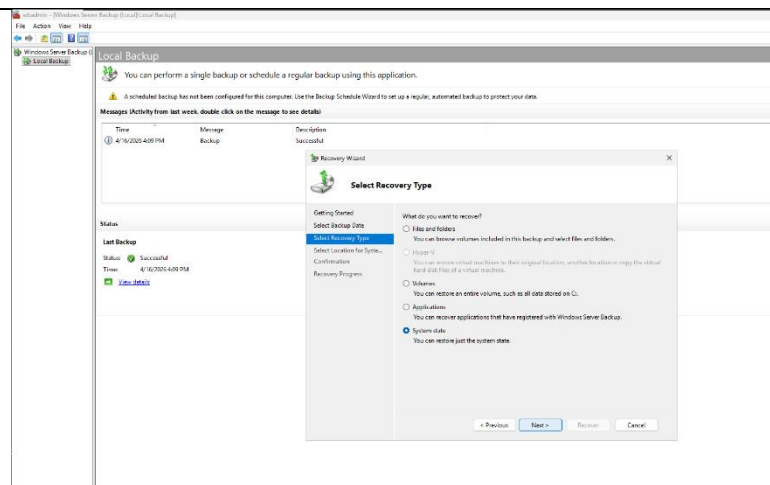

- Restart the Virtual Machine in Safe Mode.

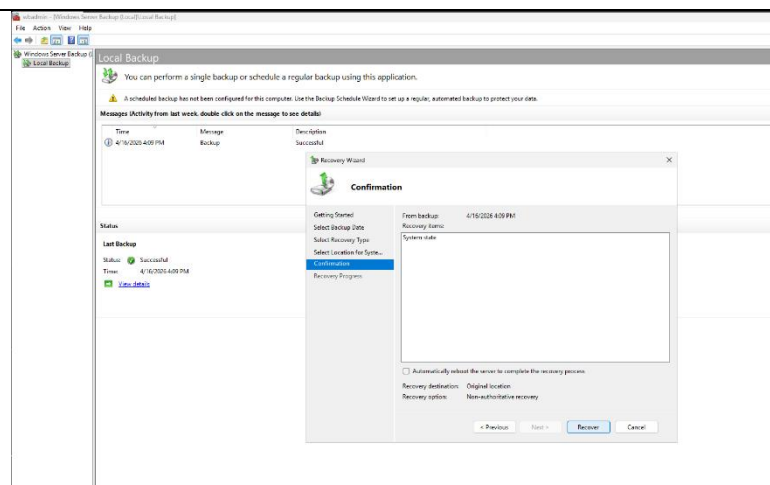

- In Windows Server Backup, click "Recover" to open the Recovery Wizard.

- In the Recovery Wizard, select the recovery type choose "System State".

- In the Recovery Wizard, confirm the recovery settings on the Confirmation screen, then click Recover.

-
- The screenshot shows the 'Local Backup' window in the Backup Exec console. The 'Recovery Progress' dialog is open, displaying the status of the system state recovery. The progress bar indicates that 33948 files have been found for recovery. The 'Recovery details' table lists the items being recovered, including Performance, DFS Replicas, COM+ Files, VSS Metadata, and VMX Writer, all of which are 0% complete. The 'Estimated time' for the recovery is 1:00:48.
- | Item | Destination | Status | Data Transferred |
|-----------------|-------------------|----------------|------------------|
| Performance... | Original location | 0% complete... | 0:00 of 120 KB |
| DFS Replicas... | Original location | 0% complete... | 0:00 of 240 KB |
| COM+ Files... | Original location | 0% complete... | 0:00 of 120 KB |
| VSS Metadata... | Original location | 0% complete... | 0:00 of 21 KB |
| VMX Writer... | Original location | 0% complete... | 0:00 of 3442 MB |
- Estimated time: 1:00:48
- You cannot cancel the system state recovery operation once it has started.
- ☐ Automatically reboot the server to complete the recovery process
- Buttons: < Previous, Next >, Close, Cancel

-
- A screenshot of a Windows XP desktop environment. The desktop background is black. On the left side, there is a vertical taskbar containing icons for Recycle Bin, Google Chrome, and Steam Workshop. In the center of the screen, a 'System Configuration' dialog box is open. The dialog box has a title bar with 'System Configuration' and a close button. The main text inside the dialog box reads: 'You may need to restart your computer to apply these changes. Before restarting, save any open files and close all programs.' Below this text is a checkbox labeled 'Don't show this message again.' which is currently unchecked. At the bottom of the dialog box, there are two buttons: 'Restart' and 'Exit without restart'. The 'Restart' button is highlighted with a blue border.

-
- The screenshot shows a Windows XP desktop environment. On the left side of the desktop, there is a vertical taskbar with icons for Recycle Bin, Google Chrome, Skype, Team Viewer, and a folder named 'Lapins'. The main window is 'Active Directory Users and Computers', which is displaying the 'accounting' group. The window has a menu bar (File, Action, View, Help) and a toolbar with various icons. The left pane shows the tree structure: Active Directory Users and Computers > account > accounting. The right pane shows a list of users with columns for Name, Type, and Description. The users listed are:
- | Name | Type | Description |
|---------------------|------|-------------|
| Aaron Kellars | User | |
| Aaron Kellars | User | |
| Margaret Jones | User | |
| Stephen Hart | User | |
| Alexander D. | User | |
| Michael Robb | User | |
| Alex Moore | User | |
| Marc Zand | User | |
| Gerard Li | User | |
| Amy Eshel | User | |
| Andrew Th. | User | |
